

# Series 10

## Standard Leak Testing Fixture

TQC have recently developed a series of standard leak test benches, the simplest and most cost effective is the Series 10.

The Series 10 leak test bench incorporates a manually actuated sealing fixture with a Nolek leak test instrument.

The unit incorporates:

- Fixture nest to locate the part
- Manually applied toggle clamps and seals
- Nolek TS500 or S9 leak test instrument
- Suitable for low cost, low to medium volume application

The unit is configurable for either over-pressure, vacuum or dosing applications. If you are currently considering a simple leak test application contact TQC to discuss your requirements
