

Series 20

standard leak testing fixture

TQC have recently developed a series of standard leak test benches.

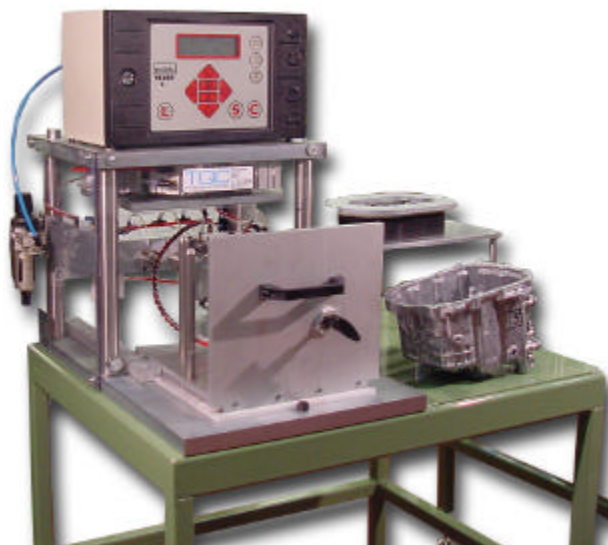

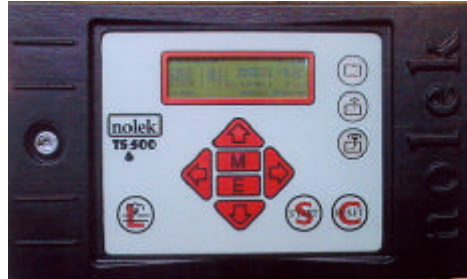

The series 20 leak test bench applies a small level of automation from the standard TS 500 or S9 Nolek leak test instruments.

The unit incorporates:

- Fixture nest to locate the part
- A combination of manually applied and automatic seals
- Self guarding sliding drawer
- Built in TS500 or S9
- Standard operator interface panel
- Suitable for low cost, low to medium volume application

The unit is configurable for either over-pressure, vacuum or dosing applications.

If you are currently considering a simple leak test application contact TQC to discuss your requirements
